Who we are

The importance of Renewal

Skillab is renewing its website, and it is not only a matter of image.

For us, renewal means above all change, development, willingness to embrace the concepts of continual training and the growth of people and their potential.

For us this is the heart and the engine behind renewal. This is why, following an ongoing dialogue with companies and their personnel, we are also renewing our range of training programmes. We want to anticipate, to accompany and to provide the tools and methods required for every individual to fulfil his or her need for constant growth.

Our aims

- to respond to market demand with competent, efficient and professional human resources
- to spread the concept of knowledge so as to be part of the development of the country and its people

The importance of Knowledge

For SKILLAB, **knowledge** is a fundamental value to be spread within companies.

Continual training is the means by which knowledge can be transferred and resources canbe developed so as to prepare them for the constant evolution of the world of work.

It is SKILLAB's aim to meet the needs of the working world in terms of the competitiveness and professionalism of its human resources. To achieve this, it has created a network system linking associated companies and those involved in the process of orientation and training, thus guaranteeing companies a wealth of integrated services.
